4	Input Files and Output Styles	109
4.1	Input Files	109
4.2	The .axiom.input File	110
4.3	Common Features of Using Output Formats	111
4.4	Monospace Two-Dimensional Mathematical Format	112
4.5	TeX Format	113
4.6	IBM Script Formula Format	113
4.7	FORTTRAN Format	114

5	Overview of Interactive Language	119
5.1	Immediate and Delayed Assignments	119
5.2	Blocks	123
5.3	if-then-else	127
5.4	Loops	129
	Compiling vs. Interpreting Loops	129
	return in Loops	129
	break in Loops	130
	break vs. => in Loop Bodies	132
	More Examples of break	132
	iterate in Loops	135
	while Loops	135
	for Loops	138
	for i in n..m repeat	138
	for i in n..m by s repeat	140
	for i in n.. repeat	141
	for x in l repeat	141
	“Such that” Predicates	142
	Parallel Iteration	143
	Mixing Loop Modifiers	146
5.5	Creating Lists and Streams with Iterators	146
5.6	An Example: Streams of Primes	149
6	User-Defined Functions, Macros and Rules	153
6.1	Functions vs. Macros	153
6.2	Macros	154
6.3	Introduction to Functions	157
6.4	Declaring the Type of Functions	158
6.5	One-Line Functions	160
6.6	Declared vs. Undeclared Functions	162
6.7	Functions vs. Operations	164
6.8	Delayed Assignments vs. Functions with No Arguments	165
6.9	How Axiom Determines What Function to Use	166
6.10	Compiling vs. Interpreting	168
6.11	Piece-Wise Function Definitions	170
	A Basic Example	170
	Picking Up the Pieces	173
	Predicates	176
6.12	Caching Previously Computed Results	178
6.13	Recurrence Relations	179
6.14	Making Functions from Objects	182
6.15	Functions Defined with Blocks	186
6.16	Free and Local Variables	189
6.17	Anonymous Functions	196
	Some Examples	196
	Declaring Anonymous Functions	198

6.18	Example: A Database	200
6.19	Example: A Famous Triangle	203
6.20	Example: Testing for Palindromes	206
6.21	Rules and Pattern Matching	208
7	Graphics	217
7.1	Two-Dimensional Graphics	218
	Plotting Two-Dimensional Functions of One Variable	218
	Plotting Two-Dimensional Parametric Plane Curves	220
	Plotting Plane Algebraic Curves	223
	Two-Dimensional Options	224
	Color	229
	Palette	230
	Two-Dimensional Control-Panel	232
	Operations for Two-Dimensional Graphics	234
	Addendum: Building Two-Dimensional Graphs	237
	Addendum: Appending a Graph to a Viewport Window Containing a Graph	244
7.2	Three-Dimensional Graphics	245
	Plotting Three-Dimensional Functions of Two Variables	245
	Plotting Three-Dimensional Parametric Space Curves	247
	Plotting Three-Dimensional Parametric Surfaces	248
	Axiom Images	251
	Three-Dimensional Options	260
	The makeObject Command	266
	Building Three-Dimensional Objects From Primitives	267
	Coordinate System Transformations	273
	Three-Dimensional Clipping	278
	Three-Dimensional Control-Panel	278
	Operations for Three-Dimensional Graphics	283
	Customization using .Xdefaults	286
8	Advanced Problem Solving	289
8.1	Numeric Functions	289
8.2	Polynomial Factorization	301
	Integer and Rational Number Coefficients	301
	Finite Field Coefficients	302
	Simple Algebraic Extension Field Coefficients	303
	Factoring Rational Functions	305
8.3	Manipulating Symbolic Roots of a Polynomial	305
	Using a Single Root of a Polynomial	305
	Using All Roots of a Polynomial	307
8.4	Computation of Eigenvalues and Eigenvectors	309
8.5	Solution of Linear and Polynomial Equations	312
	Solution of Systems of Linear Equations	312
	Solution of a Single Polynomial Equation	315
	Solution of Systems of Polynomial Equations	317

8.6	Limits	319
8.7	Laplace Transforms	323
8.8	Integration	324
8.9	Working with Power Series	328
	Creation of Power Series	328
	Coefficients of Power Series	331
	Power Series Arithmetic	332
	Functions on Power Series	333
	Converting to Power Series	336
	Power Series from Formulas	340
	Substituting Numerical Values in Power Series	343
	Example: Bernoulli Polynomials and Sums of Powers	344
8.10	Solution of Differential Equations	348
	Closed-Form Solutions of Linear Differential Equations	348
	Closed-Form Solutions of Non-Linear Differential Equations	351
	Power Series Solutions of Differential Equations	356
8.11	Finite Fields	358
	Modular Arithmetic and Prime Fields	358
	Extensions of Finite Fields	362
	Irreducible Modulus Polynomial Representations	364
	Cyclic Group Representations	367
	Normal Basis Representations	370
	Conversion Operations for Finite Fields	372
	Utility Operations for Finite Fields	376
8.12	Primary Decomposition of Ideals	383

15.5 Trees	550
defun Construct a tree node	550
defun Construct an Add node	550
defun Construct an And node	551
defun pfAttribute	551

defun Return an Application node	551
defun Return the Arg part of an Application node	552
defun Return the Op part of an Application node	552
defun Is this an And node?	552
defun Return the Left part of an And node	552
defun Return the Right part of an And node	553
defun Flatten a list of lists	553
defun Is this an Application node?	553
defun Create an Assign node	553
defun Is this an Assign node?	554
defun Return the parts of an LhsItem of an Assign node	554
defun Return the LhsItem of an Assign node	554
defun Return the RHS of an Assign node	554
defun Construct an application node for a brace	555
defun Construct an Application node for brace-bars	555
defun Construct an Application node for a bracket	555
defun Construct an Application node for bracket-bars	555
defun Create a Break node	556
defun Is this a Break node?	556
defun Return the From part of a Break node	556
defun Construct a Coerceto node	557
defun Is this a CoerceTo node?	557
defun Return the Expression part of a CoerceTo node	557
defun Return the Type part of a CoerceTo node	557
defun Return the Body of a Collect node	558
defun Return the Iterators of a Collect node	558
defun Create a Collect node	558
defun Is this a Collect node?	558
defun pfDefinition	559
defun Return the Lhs of a Definition node	559
defun Return the Rhs of a Definition node	559
defun Is this a Definition node?	559
defun Return the parts of a Definition node	560
defun Create a Do node	560
defun Is this a Do node?	560
defun Return the Body of a Do node	560
defun Construct a Sequence node	561
defun Construct an Exit node	561
defun Is this an Exit node?	561
defun Return the Cond part of an Exit	561
defun Return the Expression part of an Exit	562
defun Create an Export node	562
defun Construct an Expression leaf node	562
defun pfFirst	562
defun Create an Application Fix node	563
defun Create a Free node	563

defun Is this a Free node?	563
defun Return the parts of the Items of a Free node	564
defun Return the Items of a Free node	564
defun Construct a Forin node	564
defun Is this a ForIn node?	564
defun Return all the parts of the LHS of a ForIn node	565
defun Return the LHS part of a ForIn node	565
defun Return the Whole part of a ForIn node	565
defun pfFromDom	565
defun Construct a Fromdom node	566
defun Is this a Fromdom mode?	566
defun Return the What part of a Fromdom node	566
defun Return the Domain part of a Fromdom node	567
defun Construct a Hide node	567
defun pfIf	567
defun Is this an If node?	567
defun Return the Cond part of an If	568
defun Return the Then part of an If	568
defun pfIfThenOnly	568
defun Return the Else part of an If	568
defun Construct an Import node	569
defun Construct an Iterate node	569
defun Is this an Iterate node?	569
defun Handle an infix application	569
defun Create an Inline node	570
defun pFLam	570
defun pFLambda	571
defun Return the Body part of a Lambda node	571
defun Return the Rets part of a Lambda node	571
defun Is this a Lambda node?	571
defun Return the Args part of a Lambda node	572
defun Return the Args of a Lambda Node	572
defun Construct a Local node	572
defun Is this a Local node?	572
defun Return the parts of Items of a Local node	573
defun Return the Items of a Local node	573
defun Construct a Loop node	573
defun pfLoop1	573
defun Is this a Loop node?	574
defun Return the Iterators of a Loop node	574
defun pf0LoopIterators	574
defun pFLp	574
defun Create a Macro node	575
defun Is this a Macro node?	575
defun Return the Lhs of a Macro node	575
defun Return the Rhs of a Macro node	575

defun Construct an MLambda node	576
defun Is this an MLambda node?	576
defun Return the Args of an MLambda	576
defun Return the parts of an MLambda argument	576
defun pfMLambdaBody	577
defun Is this a Not node?	577
defun Return the Arg part of a Not node	577
defun Construct a NoValue node	577
defun Is this a Novalue node?	578
defun Return the Expr part of a Novalue node	578
defun Construct an Or node	578
defun Is this an Or node?	578
defun Return the Left part of an Or node	579
defun Return the Right part of an Or node	579
defun Return the part of a parenthesised expression	579
defun pfPretend	579
defun Is this a Pretend node?	580
defun Return the Expression part of a Pretend node	580
defun Return the Type part of a Pretend node	580
defun Construct a QualType node	580
defun Construct a Restrict node	581
defun Is this a Restrict node?	581
defun Return the Expr part of a Restrict node	581
defun Return the Type part of a Restrict node	581
defun Construct a RetractTo node	582
defun Construct a Return node	582
defun Is this a Return node?	582
defun Return the Expr part of a Return node	582
defun pfReturnNoName	583
defun Construct a ReturnTyped node	583
defun Construct a Rule node	583
defun Return the Lhs of a Rule node	584
defun Return the Rhs of a Rule node	584
defun Is this a Rule node?	584
defun pfSecond	584
defun Construct a Sequence node	585
defun Return the Args of a Sequence node	585
defun Is this a Sequence node?	585
defun Return the parts of the Args of a Sequence node	585
defun Create a Suchthat node	586
defun Is this a SuchThat node?	586
defun Return the Cond part of a SuchThat node	586
defun Create a Tagged node	586
defun Is this a Tagged node?	587
defun Return the Expression portion of a Tagged node	587
defun Return the Tag of a Tagged node	587

defun pfTaggedToTyped	587
defun pfTweakIf	588
defun Construct a Typed node	588
defun Is this a Typed node?	589
defun Return the Type of a Typed node	589
defun Return the Id of a Typed node	589
defun Construct a Typing node	589
defun Return a Tuple node	590
defun Return a Tuple from a List	590
defun Is this a Tuple node?	590
defun Return the Parts of a Tuple node	591
defun Return the parts of a Tuple	591
defun Return a list from a Sequence node	591
defun The comment is attached to all signatutres	591
defun Construct a WDeclare node	592
defun Construct a Where node	592
defun Is this a Where node?	592
defun Return the parts of the Context of a Where node	593
defun Return the Context of a Where node	593
defun Return the Expr part of a Where node	593
defun Construct a While node	593
defun Is this a While node?	594
defun Return the Cond part of a While node	594
defun Construct a With node	594
defun Create a Wrong node	594
defun Is this a Wrong node?	595

24.2 nagc.ht	3176

Zeros of Polynomials	3176
Roots of a complex polynomial equation	3180
Roots of a real polynomial equation	3186
Roots of One or More Transcendental Equations	3192
Zero of a continuous function in a given interval	3197
Solution of a system of nonlinear equations	3201
Solution of a system of nonlinear equations	3206
Checks the gradients of a set of non-linear functions	3212
Discrete Fourier transform of real or complex data values	3215
Discrete Fourier transform of n real data values	3224
Discrete Fourier transform of a Hermitian sequence	3228
Discrete Fourier transform of n complex data values	3232
Circular convolution or correlation of two real vectors	3236
Discrete Fourier transforms of m sequences	3240
Discrete Fourier transforms of m Hermitian sequences	3245
Discrete Fourier transforms of m complex sequences	3250
Discrete Fourier transform of bivariate complex data	3255
Summation of Series	3260
Complex conjugate of a sequence of n data values	3263
Complex conjugates of m Hermitian sequences	3265
Form real and imaginary parts of m Hermitian sequences	3268
24.3 nagd.ht	3271
Quadrature	3271
Approximation of the integral over a finite interval	3285
Adaptive integration over a finite integral	3292
Approximate integration with local singular points	3298
Approximate integration over a (semi-)infinite interval	3305
Approximate sine or cosine transform over finite interval	3312
Adaptive integration of weighted function over an interval	3319
Hilbert transform over finite interval	3326
Approximate Sine or Cosine over $[a, \infty]$	3332
Weights and abscissae for Gaussian quadrature formula	3340
Multidimensional integrals with finite limits	3346
Third-order finite-difference integration	3351
Monte Carlo integration over hyper-rectangular regions	3355
Ordinary Differential Equations	3361
First-order ODE over an interval with initial conditions	3368
First-order ODE with initial conditions and user function	3377
First-order ODE with variable-order, variable-step	3386
Stiff First-order ODE with variable order and step	3395
Two-point boundary-value ODE	3405
Two-point boundary value ODE with deferred correction	3412
Eigenvalue of regular singular 2nd-order Sturm-Liouville	3421
Two-point boundary-value ODE equation systems	3445
Partial differential equations	3459
Discrete elliptic PDE on rectangular region	3467

	Discrete 2nd-order elliptic PDE on rectangular regions	3475
	Helmholtz equation in 3 dimensions	3488
24.4	nage.ht	3499
	Interpolation	3499
	Cubic spline interpolant	3505
	Monotonicity-preserving piecewise cubic Hermite interpolant	3510
	Piecewise cubic Hermite interpolant	3514
	Piecewise cubic Hermite interpolant and 1st deriv	3517
	Definite integral of piecewise cubic Hermite interpolant	3520
	Bicubic spline interpolated surface	3523
	Two-D surface interpolating a set of scattered data points	3530
	Evaluate 2D interpolant function from E01SAF	3534
	Generate 2D surface interpolating a scattered data points	3538
	Evaluate 2D interpolating function from E01SEF	3544
	Curve and Surface Fitting	3547
	Least-squares polynomial approximations	3573
	Evaluate polynomial from Chebyshev-series representation	3579
	Constrained weighted least-squares polynomial	3584
	Coefficients of polynomial derivative	3593
	Find coefficients of indefinite integral of polynomial	3599
	Evaluate polynomial in Chebyshev-series representation	3605
	Weighted least-squares approx to data points	3610
	Evaluates a cubic spline from its B-spline representation	3617
	Evaluate cubic spline and 3 derivatives from B-spline	3622
	Definite integral of cubic spline from B-spline	3628
	Cubic spline approximation to an arbitrary set points	3632
	Minimal, weighted least-squares bicubic spline fit	3642
	Bicubic spline approximation to a set of data values	3651
	Bicubic spline approximation to a set of scattered data	3663
	Calculates values of a bicubic spline from B-spline	3675
	Calculates values of a bicubic spline from B-spline	3680
	Calculates l_1 solution to over-determined system equations	3685
	Sorts two-dimensional data into rectangular panels	3691
	Minimizing or Maximizing a Function	3695
	Minimizes a nonlinear function of several variable	3721
	Supply optional parameters to E04DGF from file	3737
	Supply individual optional params to E04DGF	3740
	Finding an unconstrained minimum of a sum of squares	3743
	Finding an unconstrained minimum of a sum of squares	3750
	Finding a minimum of a function	3757
	Solving linear programming problems	3764
	Solving linear or quadratic problems	3773
	Minimize an arbitrary smooth constrained function	3793
	Supply optional parameters to E04UCF from file	3845
	Supply individual optional params to E04UCF	3848
	Estimates of elements of the variance-covariance matrix	3851

24.5	nagf.ht	3858
	Linear Algebra	3858
	Matrix Factorization	3863
	Factorizes a real sparse matrix	3866
	Factorizes a real sparse matrix	3876
	Incomplete Cholesky factorization	3883
	Cholesky factor of a symmetric positive-definite matrix	3891
	QR factorization of the real m by n matrix A	3896
	$B := QB$ or $B := Q^T B$	3902
	First ncolq columns of the real m by m orthogonal matrix	3908
	QR factorization of the complex m by n matrix A	3913
	$B := QB$ or $B := Q^H B$	3919
	First ncolq columns of the complex m by m unitary matrix	3925
	Eigenvalues and Eigenvectors	3930
	Calculates all the eigenvalues of a real symmetric matrix	3937
	Eigenvalues and eigenvectors of a real symmetric matrix	3940
	Calculates all the eigenvalues of $Ax = \lambda Bx$	3943
	Eigenvalues and eigenvectors of $Ax = \lambda Bx$	3947
	Calculates all the eigenvalues of a real unsymmetric matrix	3951
	Eigenvalues and eigenvectors of a real unsymmetric matrix	3954
	Calculates all the eigenvalues of a complex matrix	3957
	Eigenvalues and eigenvectors of a complex matrix	3960
	Eigenvalues of a complex Hermitian matrix	3964
	Eigenvalues/eigenvectors complex Hermitian matrix	3967
	Eigenvalues and eigenvectors of a real symmetric matrix	3971
	Eigenvalues of generalized eigenproblem $Ax = \lambda Bx$	3975
	Eigenvalues and eigenvectors of real sparse symmetric problem	3980
	Singular value decomposition of a general real matrix	3994
	Singular value decomposition of a general complex matrix	4003
	Simultaneous Linear Equations	4011
	Approximate solution of a set of complex linear equations	4017
	Approximate solution of a set of real linear equations	4021
	Real symmetric positive-definite linear equations	4024
	Set of real linear equations with a single right-hand side	4028
	Solution of a set of real sparse linear equations	4032
	Real symmetric positive-definite tridiagonal linear equations	4036
	Solution of a linear least-squares problem, $Ax = b$	4042
	Sparse symmetric positive-definite system linear equations	4049
	Solves a system of real sparse symmetric linear equations	4055
	Solution of a system of real linear equations	4068
	Solves sparse unsymmetric equations	4073
	Linear Algebra Support Routines	4088
	Linear Equations (LAPACK)	4121
	Computes the LU factorization of a real m by n matrix	4123
	Solves a real system of linear equations	4126
	Factorization of a real symmetric positive-definite matrix	4131

Real symmetric positive-definite system of linear equations	4135
Sort vector of double precision numbers	4143
Ranks a vector of double precision numbers	4145
Ranks the rows of a matrix of double precision numbers	4148
Ranks the columns of a matrix of double precision numbers	4151
Rearranges a vector of double precision numbers	4154
Inverts a permutation	4156
24.6 nags.ht	4160
Approximations of Special Functions	4160
Exponential function e^z , for complex z	4174
Returns the value of the exponential integral $E(x)$	4177
Returns the value of the cosine integral	4181
Returns the value of the sine integral	4185
Returns the value of the Gamma function	4188
Returns a value for the logarithm of the Gamma function	4192
Incomplete gamma functions $P(a,x)$ and $Q(a,x)$	4196
Returns the value of the complementary error function	4200
Returns the value of the error function erfx	4204
Returns the value of the Bessel Function $Y_0(x)$	4207
Returns the value of the Bessel Function $Y_1(x)$	4211
Returns the value of the Bessel Function $J_0(x)$	4216
Returns the value of the Bessel Function $J_1(x)$	4220
Returns a value for the Airy function, $Ai(x)$	4225
Returns a value of the Airy function, $Bi(x)$	4230
Value of the derivative of the Airy function $Ai(x)$	4235
Value for the derivative of the Airy function $Bi(x)$	4240
Values for the Bessel functions $Y_{\nu+n}(z)$	4244
Values for the Bessel functions $J_{\nu+n}(z)$	4250
Value of the Airy function $Ai(z)$ or derivative $Ai'(z)$	4255
Value of the Airy function $Bi(z)$ or derivative $Bi'(z)$	4260
Returns a sequence of values for the Hankel functions	4264
Returns the value of the modified Bessel Function $K_0(x)$	4270
Returns the value of the modified Bessel Function $K_1(x)$	4274
Returns the value of the modified Bessel Function $I_0(x)$	4279
Returns a value for the modified Bessel Function $I_1(x)$	4283
Sequence of values for the modified Bessel $K_{\nu_n}(z)$	4287
Sequence of values for the modified Bessel $I_{\nu+n}$	4292
Returns a value for the Kelvin function $\operatorname{ber} x$	4297
Returns a value for the Kelvin function $\operatorname{bei} x$	4301
Returns a value for the Kelvin function $\operatorname{ker} x$	4305
Returns a value for the Kelvin function keix	4309
Returns a value for the Fresnel Integral $S(x)$	4314
Returns a value for the Fresnel Integral $C(x)$	4319
Returns a value of an elementary integral	4324
Value of the symmetrised elliptic integral of first kind	4328
Value of the symmetrised elliptic integral of second kind	4333

Value of the symmetrised elliptic integral of third kind	4338
24.7 nagx.ht	4343
Mathematical Constants	4343
Machine Constants	4344
Input/Output Utilities	4351
Value of the current error message unit number	4354
Value of the current advisory message unit number	4356
Print a real matrix stored in a two-dimensional array	4358
Print a complex matrix stored in a 2D array	4362
Date and Time Utilities	4366
Returns the current date and time	4367
From seven-integer format time and date to character string	4369
Compares two date/time character strings	4371
Amount of processor time used	4374

Volume 8.1: Axiom Gallery

1	General examples	1
1.1	Two dimensional functions	1
	A Simple Sine Function	2
	A Simple Sine Function, Non-adaptive plot	3
	A Simple Sine Function, Drawn to Scale	4
	A Simple Sine Function, Polar Plot	5
	A Simple Tangent Function, Clipping On	6
	A Simple Tangent Function, Clipping On	7
	Tangent and Sine	8
	A 2D Sine Function in BiPolar Coordinates	9
	A 2D Sine Function in Elliptic Coordinates	10
	A 2D Sine Wave in Polar Coordinates	11
1.2	Two dimensional curves	11
	A Line in Parabolic Coordinates	12
	Lissajous Curve	13
	A Parametric Curve	14
	A Parametric Curve in Polar Coordinates	15
1.3	Three dimensional functions	15
	A 3D Constant Function in Elliptic Coordinates	16
	A 3D Constant Function in Oblate Spheroidal	17
	A 3D Constant in Polar Coordinates	18
	A 3D Constant in Prolate Spheroidal Coordinates	19
	A 3D Constant in Spherical Coordinates	20
	A 2-Equation Space Function	21
1.4	Three dimensional curves	21
	A Parametric Space Curve	22
	A Tube around a Parametric Space Curve	23
	A 2-Equation Cylindrical Curve	24
1.5	Three dimensional surfaces	24
	A Icosahedron	25
	A 3D figure 8 immersion (Klein bagel)	27
	A 2-Equation bipolarCylindrical Surface	28
	A 3-Equation Parametric Space Surface	29
	A 3D Vector of Points in Elliptic Cylindrical	30
	A 3D Constant Function in BiPolar Coordinates	31
	A Swept in Parabolic Coordinates	32
	A Swept Cone in Parabolic Cylindrical Coordinates	33
	A Truncated Cone in Toroidal Coordinates	34
	A Swept Surface in Paraboloidal Coordinates	35
2	Jenks Book images	37
	The Complex Gamma Function	38
	The Complex Arctangent Function	39

3	Hyperdoc examples	41
3.1	Two dimensional examples	41
	A function of one variable	42
	A Parametric function	43
	A Polynomial in 2 variables	44
3.2	Three dimensional examples	44
	A function of two variables	45
	A parametrically defined curve	46
	A parametrically defined surface	47
4	CRC Standard Curves and Surfaces	49
4.1	Standard Curves and Surfaces	49
4.2	CRC graphs	50
	Functions with $x^{n/m}$	50
	Functions with x^n and $(a + bx)^m$	66
	Functions with $a^2 + x^2$ and x^m	132
	Functions with $a^2 - x^2$ and x^m	148
	Functions with $a^3 + x^3$ and x^m	164
	Functions with $a^3 - x^3$ and x^m	176
	Functions with $a^4 + x^4$ and x^m	188
	Functions with $a^4 - x^4$ and x^m	200
	Functions with $(a + bx)^{1/2}$ and x^m	212
5	Pasta by Design	231

6 Package for Algebraic Function Fields	149
7 Interpolation Formulas	151
8 Finite Fields in Axiom (Grabmeier/Scheerhorn)	155
8.1 Basic theory and notations	156
8.2 Categories for finite field domains	158
8.3 General finite field functions	159
E as an algebra of rank n over F	159
The $F[X]$ -module structure of E	160
The cyclic group E^*	161
Discrete logarithm	162
Elements of maximal order	163
Enumeration of elements of E	164
Conversion between elements of the field and its groundfield	164
8.4 Prime field	164
Extension Constructors of Finite Fields	165
8.5 Polynomial basis representation	166
8.6 Cyclic group representation	167
Operations of multiplicative nature	167
Addition and Zech logarithm	168
Time expensive operations	169
8.7 Normal basis representation	170
Operations of additive nature	170
Multiplication and normal basis complexity	172
Norm and multiplicative inverse	173
Exponentiation	174
8.8 Homomorphisms between finite fields	175
Basis change between normal and polynomial basis representation	177
Conversion between different extensions	177
8.9 Polynomials over finite fields	179

Root finding	179
Polynomials with certain properties	179
Testing whether a polynomial is of a given kind	180
Searching the next polynomial of a given kind	180
Creating polynomials	181
Number of polynomials of a given kind and degree	181
Some other functions concerning polynomials	182
8.10 Future directions	183
8.11 Comparison of computation times between different representations	183
The extension fields $GF(5^4)$ over $GF(5)$ and $GF(2^{10})$ over $GF(2)$	184
Different extensions of $GF(5^{21})$ over $GF(5)$	184
8.12 Dependencies between the constructors	185
9 Potential Future Algebra	187
10 Groebner Basis	189
11 Greatest Common Divisor	191
12 Polynomial Factorization	193
13 Cylindrical Algebraic Decomposition	195
14 Differential Forms	197
14.1 From differentials to differential forms	197
The wedge product	198
The exterior derivative	201
The Hodge dual	203
15 Pade approximant	205
16 Schwartz-Zippel lemma and testing polynomial identities	207
17 Chinese Remainder Theorem	209
18 Gaussian Elimination	211
19 Diophantine Equations	213
Bibliography	215
Index	225

Example 1.1	744
Stretching and Scaling	745
Perspective Transformations	746
Transform Equations	748
Summary	749
DenavitHartenbergMatrix (DHMATRIX)	766
domain DEQUEUE Dequeue	769
Dequeue (DEQUEUE)	787
domain DERHAM DeRhamComplex	796
DeRhamComplex (DERHAM)	861
domain DSTREE DesingTree	873
DesingTree (DSTREE)	875
domain DSMP DifferentialSparseMultivariatePolynomial	879
DifferentialSparseMultivariatePolynomial (DSMP)	883
domain DIRPROD DirectProduct	886
DirectProduct (DIRPROD)	889
domain DPMM DirectProductMatrixModule	894
DirectProductMatrixModule (DPMM)	897
domain DPMO DirectProductModule	899
DirectProductModule (DPMO)	902
domain DIRRING DirichletRing	904
DirichletRing (DIRRING)	909
domain DMP DistributedMultivariatePolynomial	915
DistributedMultivariatePolynomial (DMP)	922
domain DIV Divisor	924
Divisor (DIV)	925
domain DFLOAT DoubleFloat	932
DoubleFloat (DFLOAT)	942
domain DFMAT DoubleFloatMatrix	960
DoubleFloatMatrix (DFMAT)	964
domain DFVEC DoubleFloatVector	968
DoubleFloatVector (DFVEC)	972
domain DROPT DrawOption	975
DrawOption (DROPT)	976
domain D01AJFA d01ajfAnnaType	985
d01ajfAnnaType (D01AJFA)	986
domain D01AKFA d01akfAnnaType	989
d01akfAnnaType (D01AKFA)	990
domain D01ALFA d01alfAnnaType	993
d01alfAnnaType (D01ALFA)	995
domain D01AMFA d01amfAnnaType	998
d01amfAnnaType (D01AMFA)	1000
domain D01ANFA d01anfAnnaType	1003

d01anfAnnaType (D01ANFA)	1004
domain D01APFA d01apfAnnaType	1008
d01apfAnnaType (D01APFA)	1009
domain D01AQFA d01aqfAnnaType	1013
d01aqfAnnaType (D01AQFA)	1014
domain D01ASFA d01asfAnnaType	1018
d01asfAnnaType (D01ASFA)	1019
domain D01FCFA d01fcfAnnaType	1023
d01fcfAnnaType (D01FCFA)	1024
domain D01GBFA d01gbfAnnaType	1028
d01gbfAnnaType (D01GBFA)	1029
domain D01TRNS d01TransformFunctionType	1032
d01TransformFunctionType (D01TRNS)	1034
domain D02BBFA d02bbfAnnaType	1040
d02bbfAnnaType (D02BBFA)	1042
domain D02BHFA d02bhfAnnaType	1046
d02bhfAnnaType (D02BHFA)	1047
domain D02CJFA d02cjfAnnaType	1052
d02cjfAnnaType (D02CJFA)	1053
domain D02EJFA d02ejfAnnaType	1057
d02ejfAnnaType (D02EJFA)	1058
domain D03EEFA d03eefAnnaType	1063
d03eefAnnaType (D03EEFA)	1065
domain D03FAFA d03fafAnnaType	1068
d03fafAnnaType (D03FAFA)	1070

6 Chapter E 1073

domain EFULS ElementaryFunctionsUnivariateLaurentSeries	1073
ElementaryFunctionsUnivariateLaurentSeries (EFULS)	1075
domain EFUPXS ElementaryFunctionsUnivariatePuisseuxSeries	1091
ElementaryFunctionsUnivariatePuisseuxSeries (EFUPXS)	1093
domain EQ Equation	1105
Equation (EQ)	1111
domain EQTBL EqTable	1122
EqTable (EQTBL)	1126
domain EMR EuclideanModularRing	1128
EuclideanModularRing (EMR)	1129
domain EXIT Exit	1134
Exit (EXIT)	1137
domain EXPEXPAN ExponentialExpansion	1138
ExponentialExpansion (EXPEXPAN)	1142
domain EXPR Expression	1148
Expression (EXPR)	1161
domain EXPUPXS ExponentialOfUnivariatePuisseuxSeries	1190
ExponentialOfUnivariatePuisseuxSeries (EXPUPXS)	1194
domain EAB ExtAlgBasis	1198

ExtAlgBasis (EAB)	1199
domain E04DGFA e04dgfAnnaType	1202
e04dgfAnnaType (E04DGFA)	1204
domain E04FDFA e04fdfAnnaType	1207
e04fdfAnnaType (E04FDFA)	1209
domain E04GCFA e04gcfAnnaType	1213
e04gcfAnnaType (E04GCFA)	1215
domain E04JAFA e04jafAnnaType	1220
e04jafAnnaType (E04JAFA)	1221
domain E04MBFA e04mbfAnnaType	1226
e04mbfAnnaType (E04MBFA)	1227
domain E04NAFA e04nafAnnaType	1231
e04nafAnnaType (E04NAFA)	1232
domain E04UCFA e04ucfAnnaType	1237
e04ucfAnnaType (E04UCFA)	1238
7 Chapter F	1245
domain FR Factored	1245
Factored (FR)	1260
domain FILE File	1280
File (FILE)	1285
domain FNAME FileName	1289
FileName (FNAME)	1296
domain FDIV FiniteDivisor	1298
FiniteDivisor (FDIV)	1300
domain FF FiniteField	1305
FiniteField (FF)	1308
domain FFCG FiniteFieldCyclicGroup	1310
FiniteFieldCyclicGroup (FFCG)	1313
domain FFCGX FiniteFieldCyclicGroupExtension	1316
FiniteFieldCyclicGroupExtension (FFCGX)	1319
domain FFCGP FiniteFieldCyclicGroupExtensionByPolynomial	1321
FiniteFieldCyclicGroupExtensionByPolynomial (FFCGP)	1325
domain FFX FiniteFieldExtension	1338
FiniteFieldExtension (FFX)	1341
domain FFP FiniteFieldExtensionByPolynomial	1343
FiniteFieldExtensionByPolynomial (FFP)	1346
domain FFNB FiniteFieldNormalBasis	1357
FiniteFieldNormalBasis (FFNB)	1360
domain FFNBX FiniteFieldNormalBasisExtension	1363
FiniteFieldNormalBasisExtension (FFNBX)	1366
domain FFNBP FiniteFieldNormalBasisExtensionByPolynomial	1369
FiniteFieldNormalBasisExtensionByPolynomial (FFNBP)	1372
domain FARRAY FlexibleArray	1388
FlexibleArray (FARRAY)	1395
domain FLOAT Float	1397

Float (FLOAT)	1420
domain FC FortranCode	1464
FortranCode (FC)	1466
domain FEXPR FortranExpression	1489
FortranExpression (FEXPR)	1492
domain FORTRAN FortranProgram	1505
FortranProgram (FORTRAN)	1506
domain FST FortranScalarType	1515
FortranScalarType (FST)	1517
domain FTEM FortranTemplate	1523
FortranTemplate (FTEM)	1524
domain FT FortranType	1528
FortranType (FT)	1530
domain FCOMP FourierComponent	1534
FourierComponent (FCOMP)	1536
domain FSERIES FourierSeries	1538
FourierSeries (FSERIES)	1539
domain FRAC Fraction	1543
Fraction (FRAC)	1551
domain FRIDEAL FractionalIdeal	1567
FractionalIdeal (FRIDEAL)	1568
domain FRMOD FramedModule	1576
FramedModule (FRMOD)	1577
domain FAGROUP FreeAbelianGroup	1582
FreeAbelianGroup (FAGROUP)	1587
domain FAMONOID FreeAbelianMonoid	1589
FreeAbelianMonoid (FAMONOID)	1591
domain FGROUPE FreeGroup	1592
FreeGroup (FGROUP)	1594
domain FM FreeModule	1597
FreeModule (FM)	1599
domain FM1 FreeModule1	1602
FreeModule1 (FM1)	1604
domain FMONOID FreeMonoid	1609
FreeMonoid (FMONOID)	1610
domain FNLA FreeNilpotentLie	1618
FreeNilpotentLie (FNLA)	1620
domain FPARFRAC FullPartialFractionExpansion	1625
FullPartialFractionExpansion (FPARFRAC)	1635
domain FUNCTION FunctionCalled	1643
FunctionCalled (FUNCTION)	1644

8 Chapter G	1647
domain GDMP GeneralDistributedMultivariatePolynomial	1647
GeneralDistributedMultivariatePolynomial (GDMP)	1658
domain GMODPOL GeneralModulePolynomial	1669
GeneralModulePolynomial (GMODPOL)	1670
domain GCNAALG GenericNonAssociativeAlgebra	1673
GenericNonAssociativeAlgebra (GCNAALG)	1676
domain GPOLSET GeneralPolynomialSet	1687
GeneralPolynomialSet (GPOLSET)	1689
domain GSTBL GeneralSparseTable	1693
GeneralSparseTable (GSTBL)	1697
domain GTSET GeneralTriangularSet	1699
GeneralTriangularSet (GTSET)	1702
domain GSERIES GeneralUnivariatePowerSeries	1708
GeneralUnivariatePowerSeries (GSERIES)	1712
domain GRIMAGE GraphImage	1717
GraphImage (GRIMAGE)	1719
domain GOPT GuessOption	1734
GuessOption (GOPT)	1736
domain GOPT0 GuessOptionFunctions0	1742
GuessOptionFunctions0 (GOPT0)	1744
9 Chapter H	1755
domain HASHTBL HashTable	1755
HashTable (HASHTBL)	1757
domain HEAP Heap	1760
Heap (HEAP)	1773
domain HEXADEC HexadecimalExpansion	1780
HexadecimalExpansion (HEXADEC)	1786
package HTMLFORM HTMLFormat	1790
Overview	1790
Why output to HTML?	1791
Using the formatter	1791
Form of the output	1792
Matrix Formatting	1792
Programmers Guide	1792
Future Developments	1793
HTMLFormat (HTMLFORM)	1797
domain HDP HomogeneousDirectProduct	1832
HomogeneousDirectProduct (HDP)	1835
domain HDMP HomogeneousDistributedMultivariatePolynomial	1837
HomogeneousDistributedMultivariatePolynomial (HDMP)	1844
domain HELLDIV HyperellipticFiniteDivisor	1846
HyperellipticFiniteDivisor (HELLDIV)	1848

10 Chapter I	1857
domain ICP InfClsPt	1857
InfClsPt (ICP)	1858
domain ICARD IndexCard	1860
IndexCard (ICARD)	1861
domain IBITS IndexedBits	1865
IndexedBits (IBITS)	1870
domain IDPAG IndexedDirectProductAbelianGroup	1874
IndexedDirectProductAbelianGroup (IDPAG)	1876
domain IDPAM IndexedDirectProductAbelianMonoid	1879
IndexedDirectProductAbelianMonoid (IDPAM)	1880
domain IDPO IndexedDirectProductObject	1884
IndexedDirectProductObject (IDPO)	1886
domain IDPOAM IndexedDirectProductOrderedAbelianMonoid	1889
IndexedDirectProductOrderedAbelianMonoid (IDPOAM)	1890
domain IDPOAMS IndexedDirectProductOrderedAbelianMonoidSup	1892
IndexedDirectProductOrderedAbelianMonoidSup (IDPOAMS)	1893
domain INDE IndexedExponents	1896
IndexedExponents (INDE)	1897
domain IFARRAY IndexedFlexibleArray	1899
IndexedFlexibleArray (IFARRAY)	1902
domain ILIST IndexedList	1913
IndexedList (ILIST)	1916
domain IMATRIX IndexedMatrix	1925
IndexedMatrix (IMATRIX)	1928
domain IARRAY1 IndexedOneDimensionalArray	1932
IndexedOneDimensionalArray (IARRAY1)	1934
domain ISTRING IndexedString	1939
IndexedString (ISTRING)	1942
domain IARRAY2 IndexedTwoDimensionalArray	1952
IndexedTwoDimensionalArray (IARRAY2)	1954
domain IVECTOR IndexedVector	1955
IndexedVector (IVECTOR)	1958
domain ITUPLE InfiniteTuple	1959
InfiniteTuple (ITUPLE)	1960
domain INFCLSPT InfinitelyClosePoint	1962
InfinitelyClosePoint (INFCLSPT)	1964
domain INFCLSPS InfinitelyClosePointOverPseudoAlgebraicClosureOffiniteField	1971
InfinitelyClosePointOverPseudoAlgebraicClosureOffiniteField (INFCLSPS)	1973
domain IAN InnerAlgebraicNumber	1974
InnerAlgebraicNumber (IAN)	1978
domain IFF InnerFiniteField	1984
InnerFiniteField (IFF)	1987
domain IFAMON InnerFreeAbelianMonoid	1989
InnerFreeAbelianMonoid (IFAMON)	1991
domain IIARRAY2 InnerIndexedTwoDimensionalArray	1994

InnerIndexedTwoDimensionalArray (IIARRAY2)	1996
domain IPADIC InnerPAdicInteger	2000
InnerPAdicInteger (IPADIC)	2002
domain IPF InnerPrimeField	2013
InnerPrimeField (IPF)	2016

Volume 10.4: Axiom Algebra: Packages

1 Chapter Overview	1
2 Chapter A	3
package AFALGGRO AffineAlgebraicSetComputeWithGroebnerBasis	3
AffineAlgebraicSetComputeWithGroebnerBasis (AFALGGRO)	4
package AFALGRES AffineAlgebraicSetComputeWithResultant	11
AffineAlgebraicSetComputeWithResultant (AFALGRES)	12
package AF AlgebraicFunction	18
AlgebraicFunction (AF)	20
package INTHERAL AlgebraicHermiteIntegration	30
AlgebraicHermiteIntegration (INTHERAL)	30
package INTALG AlgebraicIntegrate	34
AlgebraicIntegrate (INTALG)	36
package INTAF AlgebraicIntegration	48
AlgebraicIntegration (INTAF)	49
package ALGMANIP AlgebraicManipulations	52
AlgebraicManipulations (ALGMANIP)	53
package ALGMFACT AlgebraicMultFact	61
AlgebraicMultFact (ALGMFACT)	63
package ALGPKG AlgebraPackage	65
AlgebraPackage (ALGPKG)	66
package ALGFACT AlgFactor	83
AlgFactor (ALGFACT)	84
package INTPACK AnnaNumericalIntegrationPackage	88
AnnaNumericalIntegrationPackage (INTPACK)	90
package OPTPACK AnnaNumericalOptimizationPackage	106
AnnaNumericalOptimizationPackage (OPTPACK)	108
package ODEPACK AnnaOrdinaryDifferentialEquationPackage	121
AnnaOrdinaryDifferentialEquationPackage (ODEPACK)	122
package PDEPACK AnnaPartialDifferentialEquationPackage	135
AnnaPartialDifferentialEquationPackage (PDEPACK)	136
package ANY1 AnyFunctions1	144
AnyFunctions1 (ANY1)	146
package API ApplicationProgramInterface	148
ApplicationProgramInterface (API)	155
package APPRULE ApplyRules	157
ApplyRules (APPRULE)	159
package APPLYORE ApplyUnivariateSkewPolynomial	164
ApplyUnivariateSkewPolynomial (APPLYORE)	165
package ASSOCEQ AssociatedEquations	166
AssociatedEquations (ASSOCEQ)	168
package PMPRED AttachPredicates	172
AttachPredicates (PMPRED)	173

package AXSERV AxiomServer	175
AxiomServer (AXSERV)	176

3 Chapter B 203

package BALFACT BalancedFactorisation	203
BalancedFactorisation (BALFACT)	204
package BOP1 BasicOperatorFunctions1	206
BasicOperatorFunctions1 (BOP1)	208
package BEZIER Bezier	213
Bezier (BEZIER)	223
package BEZOUT BezoutMatrix	226
BezoutMatrix (BEZOUT)	227
package BLUPACK BlowUpPackage	233
BlowUpPackage (BLUPACK)	234
package BOUNDZRO BoundIntegerRoots	244
BoundIntegerRoots (BOUNDZRO)	245
package BRILL BrillhartTests	249
BrillhartTests (BRILL)	250

4 Chapter C 255

package CARTEN2 CartesianTensorFunctions2	255
CartesianTensorFunctions2 (CARTEN2)	256
package CHVAR ChangeOfVariable	258
ChangeOfVariable (CHVAR)	259
package CPIMA CharacteristicPolynomialInMonogenicalAlgebra	264
CharacteristicPolynomialInMonogenicalAlgebra (CPIMA)	265
package CHARPOL CharacteristicPolynomialPackage	267
CharacteristicPolynomialPackage (CHARPOL)	268
package IBACHIN ChineseRemainderToolsForIntegralBases	270
ChineseRemainderToolsForIntegralBases (IBACHIN)	271
package CVMP CoerceVectorMatrixPackage	275
CoerceVectorMatrixPackage (CVMP)	276
package COMBF CombinatorialFunction	278
CombinatorialFunction (COMBF)	282
package CDEN CommonDenominator	304
CommonDenominator (CDEN)	305
package COMMONOP CommonOperators	307
CommonOperators (COMMONOP)	309
package COMMUPC CommuteUnivariatePolynomialCategory	320
CommuteUnivariatePolynomialCategory (COMMUPC)	322
package COMPFAC ComplexFactorization	324
ComplexFactorization (COMPFAC)	325
package COMPLEX2 ComplexFunctions2	328
ComplexFunctions2 (COMPLEX2)	330
package CINTSLPE ComplexIntegerSolveLinearPolynomialEquation	331
ComplexIntegerSolveLinearPolynomialEquation (CINTSLPE)	332

package COMPLPAT ComplexPattern	334
ComplexPattern (COMPLPAT)	335
package CPMATCH ComplexPatternMatch	337
ComplexPatternMatch (CPMATCH)	338
package CRFP ComplexRootFindingPackage	340
ComplexRootFindingPackage (CRFP)	342
package CMPLXRT ComplexRootPackage	364
ComplexRootPackage (CMPLXRT)	365
package CTRIGMNP ComplexTrigonometricManipulations	367
ComplexTrigonometricManipulations (CTRIGMNP)	368
package ODECONST ConstantLODE	372
ConstantLODE (ODECONST)	374
package COORDSYS CoordinateSystems	377
CoordinateSystems (COORDSYS)	379
package CRAPACK CRAPackage	386
CRAPackage (CRAPACK)	387
package CYCLES CycleIndicators	391
CycleIndicators (CYCLES)	410
package CSTTOOLS CyclicStreamTools	418
CyclicStreamTools (CSTTOOLS)	419
package CYCLOTOM CyclotomicPolynomialPackage	422
CyclotomicPolynomialPackage (CYCLOTOM)	423
package CAD CylindricalAlgebraicDecompositionPackage	426
CylindricalAlgebraicDecompositionPackage (CAD)	427
package CADU CylindricalAlgebraicDecompositionUtilities	433
CylindricalAlgebraicDecompositionUtilities (CADU)	434
5 Chapter D	437
package DFINTTLS DefiniteIntegrationTools	437
DefiniteIntegrationTools (DFINTTLS)	438
package DEGRED DegreeReductionPackage	448
DegreeReductionPackage (DEGRED)	449
package DTP DesingTreePackage	451
DesingTreePackage (DTP)	453
package DIOSP DiophantineSolutionPackage	467
DiophantineSolutionPackage (DIOSP)	469
package DIRPROD2 DirectProductFunctions2	475
DirectProductFunctions2 (DIRPROD2)	476
package DLP DiscreteLogarithmPackage	478
DiscreteLogarithmPackage (DLP)	480
package DISPLAY DisplayPackage	483
DisplayPackage (DISPLAY)	484
package DDFACT DistinctDegreeFactorize	489
DistinctDegreeFactorize (DDFACT)	490
package DFSFUN DoubleFloatSpecialFunctions	500
DoubleFloatSpecialFunctions (DFSFUN)	515

The Gamma Function	520
The Exponential Integral	521
En:(PI,R)→OPR	526
The Ei Function	527
The Fresnel Integral[?, ?]	553
The logGamma Function	556
package DBLRESP DoubleResultantPackage	560
DoubleResultantPackage (DBLRESP)	562
package DRAWCX DrawComplex	564
DrawComplex (DRAWCX)	565
package DRAWHACK DrawNumericHack	572
DrawNumericHack (DRAWHACK)	573
package DROPT0 DrawOptionFunctions0	575
DrawOptionFunctions0 (DROPT0)	576
package DROPT1 DrawOptionFunctions1	583
DrawOptionFunctions1 (DROPT1)	584
package D01AGNT d01AgentsPackage	585
d01AgentsPackage (D01AGNT)	609
package D01WGTS d01WeightsPackage	619
d01WeightsPackage (D01WGTS)	620
package D02AGNT d02AgentsPackage	631
d02AgentsPackage (D02AGNT)	656
package D03AGNT d03AgentsPackage	667
d03AgentsPackage (D03AGNT)	684

6 Chapter E 689

package EP EigenPackage	689
EigenPackage (EP)	690
package EF ElementaryFunction	699
ElementaryFunction (EF)	713

Volume 10.5: Axiom Algebra: Numerics

1	Numerical Analysis	1
2	The Quality of Computed Solutions by Sven Hammarling	3
2.1	Introduction	3
2.2	Floating Point Numbers and IEEE Arithmetic	4
2.2.1	Example 2.1 (Floating point numbers)	4
2.3	Why Worry about Computed Solutions?	6
2.3.1	Example 3.1 (Cancellation)	6
2.3.2	Example 3.2 (Sample variance [?],Section 1.9)	7
2.3.3	Example 3.3 (Hypotenuse)	8
2.3.4	Example 3.4 (Modulus of a complex number)	9
2.3.5	Example 3.5 (Sample mean)[?]	10
2.4	Condition, Stability and Error Analysis	11
2.4.1	Condition	11
subsubsection.2.4.1.1	subsubsection.2.4.1.2 subsubsection.2.4.1.3 subsubsection.2.4.1.4 sub-	
subsubsection.2.4.1.5	subsubsection.2.4.1.6 subsubsection.2.4.1.7 subsubsection.2.4.1.8	
2.4.2	Stability	18
subsubsection.2.4.2.1	subsubsection.2.4.2.2 subsubsection.2.4.2.3 subsubsection.2.4.2.4 sub-	
subsubsection.2.4.2.5		
2.4.3	Error Analysis	23
subsubsection.2.4.3.1	subsubsection.2.4.3.2 subsubsection.2.4.3.3 subsubsection.2.4.3.4	
2.5	Floating Point Error Analysis	27
2.5.1	Example 5.1 (Floating point numbers)	27
2.5.2	Example 5.2 (Product of values)	28
2.5.3	Example 5.3 (Sum of values)	29
2.5.4	Example 5.4 (Difference of two squares)	29
2.5.5	Example 5.5 (The need for pivoting)	31
2.6	Posing the Mathematical Problem	34
2.7	Error Bounds and Software	34
2.8	Other Approaches	38
2.8.1	Example 8.1 (Cancellation and interval arithmetic)	39
2.9	Summary	39
3	Chapter Overview	41
4	Optimizations	45
5	Algebra Cover Code	47
5.1	package BLAS1 BlasLevelOne	47
5.1.1	Axiom Package unit tests	47
5.1.2	Axiom help page	81
5.1.3	BlasLevelOne (BLAS1 Spad code)	82
5.2	lsame	89
5.2.1	fortran code	89

5.2.2	lisp code	91
5.3	xerbla	92
5.3.1	fortran code	92
5.3.2	lisp code	93
6	BLAS Level 1 Real Vector Operations	95
6.1	sasum - the sum of the absolute values	95
6.1.1	Axiom unit tests	95
6.1.2	Axiom help page	95
6.1.3	fortran code	96
6.1.4	lisp code	97
6.2	saxpy - constant times a vector plus a vector	99
6.2.1	Axiom unit tests	99
6.2.2	Axiom help page	99
6.2.3	fortran code	100
6.2.4	lisp code	101
6.3	scabs1 - $\text{abs}(\text{real}(z)) + \text{abs}(\text{imag}(z))$ of a complex number	103
6.3.1	Axiom unit tests	103
6.3.2	Axiom help page	104
6.3.3	fortran code	104
6.3.4	lisp code	105
6.4	scasum - $\text{abs}(\text{real}(z)) + \text{abs}(\text{imag}(z))$ of a complex vector	105
6.4.1	Axiom unit tests	105
6.4.2	Axiom help page	106
6.4.3	fortran code	106
6.4.4	lisp code	107
6.5	scnorm2 - Euclidean norm of a vector	109
6.5.1	Axiom unit tests	109
6.5.2	Axiom help page	109
6.5.3	fortran code	110
6.5.4	lisp code	111
6.6	scopy - copy a vector x to a vector y	112
6.6.1	Axiom unit tests	112
6.6.2	Axiom help page	113
6.6.3	fortran code	113
6.6.4	lisp code	115
6.7	sdot - compute the dot product of two vectors	117
6.7.1	Axiom unit tests	117
6.7.2	Axiom help page	117
6.7.3	fortran code	118
6.7.4	lisp code	119
6.8	sdsdot - compute the inner product of two vectors	121
6.8.1	Axiom unit tests	121
6.8.2	Axiom help page	121
6.8.3	fortran code	122
6.8.4	lisp code	124

6.9	snrm2 - Euclidean norm of a vector $\sqrt{x'x}$	126
6.9.1	Axiom unit tests	126
6.9.2	Axiom help page	126
6.9.3	fortran code	127
6.9.4	lisp code	128
6.10	srot - applies a plane rotation	129
6.10.1	Axiom unit tests	129
6.10.2	Axiom help page	130
6.10.3	fortran code	130
6.10.4	lisp code	131
6.11	srotg - construct givens plane rotation	133
6.11.1	Axiom unit tests	133
6.11.2	Axiom help page	133
6.11.3	fortran code	134
6.11.4	lisp code	135
6.12	srotm - apply a modified givens transformation	135
6.12.1	Axiom unit tests	135
6.12.2	Axiom help page	136
6.12.3	fortran code	137
6.12.4	lisp code	140
6.13	srotmg - apply a modified givens transformation	143
6.13.1	Axiom unit tests	143
6.13.2	Axiom help page	143
6.13.3	fortran code	144
6.13.4	lisp code	148
6.14	sscal - scales a vector by a constant	150
6.14.1	Axiom unit tests	150
6.14.2	Axiom help page	150
6.14.3	fortran code	151
6.14.4	lisp code	152
6.15	sswap - interchange two vectors	154
6.15.1	Axiom unit tests	154
6.15.2	Axiom help page	154
6.15.3	fortran code	155
6.15.4	lisp code	156
7	BLAS Level 1 Double Vector Operations	159
7.1	dasum - sum of the absolute values	159
7.1.1	Axiom unit tests	159
7.1.2	Axiom help page	164
7.1.3	fortran code	168
7.1.4	fortran unit test	169
7.1.5	lisp code	172
7.2	daxpy - constant time vector plus a vector	172
7.2.1	Axiom unit tests	172
7.2.2	Axiom help page	176

7.2.3	fortran code	180
7.2.4	fortran unit test	181
7.2.5	lisp code	184
7.3	dcabs1 - $\text{abs}(\text{real}(z)) + \text{abs}(\text{imag}(z))$	185
7.3.1	Axiom unit tests	185
7.3.2	Axiom help page	187
7.3.3	fortran code	188
7.3.4	fortran unit test	189
7.3.5	lisp code	190
7.4	dcopy - copy a vector x to a vector y	190
7.4.1	Axiom unit tests	190
7.4.2	Axiom help page	194
7.4.3	fortran code	196
7.4.4	fortran unit test	198
7.4.5	lisp code	200
7.5	ddot - dot product of two vectors	202
7.5.1	Axiom unit tests	202
7.5.2	Axiom help page	203
7.5.3	fortran code	205
7.5.4	fortran unit test	207
7.5.5	lisp code	209
7.6	dnrm2 - Euclidean norm of a vector	210
7.6.1	Axiom unit tests	210
7.6.2	Axiom help page	211
7.6.3	fortran code	212
7.6.4	fortran unit test	214
7.6.5	lisp code	215
7.7	drot - applies a plane rotation	216
7.7.1	Axiom unit tests	216
7.7.2	Axiom help page	221
7.7.3	fortran code	223
7.7.4	fortran unit test	225
7.7.5	lisp code	230
7.8	drotg - constructs givens plane rotation	233
7.8.1	Axiom unit tests	233
7.8.2	Axiom help page	235
7.8.3	fortran code	239
7.8.4	fortran unit test	240
7.8.5	lisp code	244
7.9	drotm - Apply the modified givens transformation to DX^T	246
7.9.1	Axiom unit tests	246
7.9.2	Axiom help page	246
7.9.3	fortran code	248
7.9.4	lisp code	250
7.10	drotmg - Construct the modified givens transformation matrix	253
7.10.1	Axiom unit tests	253

7.10.2	Axiom help page	253
7.10.3	fortran code	255
7.10.4	lisp code	258
7.11	dscal - scale a vector by a constant	260
7.11.1	Axiom unit tests	260
7.11.2	Axiom help page	262
7.11.3	fortran code	264
7.11.4	fortran unit test	265
7.11.5	lisp code	267
7.12	dsdot - compute the inner product of two vectors	268
7.12.1	Axiom unit tests	268
7.12.2	Axiom help page	269
7.12.3	fortran code	270
7.12.4	lisp code	271
7.13	dswap - interchanges two vectors	272
7.13.1	Axiom unit tests	272
7.13.2	Axiom help page	274
7.13.3	fortran code	276
7.13.4	fortran unit test	278
7.13.5	lisp code	280
7.14	dtrsv - solve $Ax = b$ or $A^T x = b$	281
7.14.1	Axiom unit tests	281
7.14.2	Axiom help page	281
7.14.3	fortran code	283
7.14.4	lisp code	287
7.15	dzasum - sum of the dcabs1 of a complex vector	295
7.15.1	Axiom unit tests	295
7.15.2	Axiom help page	296
7.15.3	fortran code	297
7.15.4	fortran unit test	298
7.15.5	lisp code	300
7.16	dznrm2 - Euclidean norm of a vector = $\sqrt{x^H * x}$	301
7.16.1	Axiom unit tests	301
7.16.2	Axiom help page	302
7.16.3	fortran code	304
7.16.4	fortran unit test	306
7.16.5	lisp code	307
7.17	icamax - maximum index function	309
7.17.1	Axiom unit tests	309
7.17.2	Axiom help page	310
7.17.3	fortran code	312
7.17.4	fortran unit test	314
7.17.5	lisp code	316
7.18	idamax - index of element having max. absolute value	317
7.18.1	Axiom unit tests	317
7.18.2	Axiom help page	319

7.18.3	fortran code	322
7.18.4	fortran unit test	324
7.18.5	lisp code	325
7.19	isamax - index of element having max. absolute value	326
7.19.1	Axiom unit tests	326
7.19.2	Axiom help page	328
7.19.3	fortran code	331
7.19.4	fortran unit test	332
7.19.5	lisp code	334
7.20	izamax	335
7.20.1	Axiom unit tests	335
7.20.2	Axiom help page	336
7.20.3	fortran code	338
7.20.4	fortran unit test	339
7.20.5	lisp code	341
8	BLAS Level 1 Complex Vector Operations	345
8.1	caxpy - constant times a vector plus a vector	345
8.1.1	Axiom unit tests	345
8.1.2	Axiom help page	345
8.1.3	fortran code	346
8.1.4	lisp code	347
8.2	ccopy - copies a vector x to a vector y	349
8.2.1	Axiom unit tests	349
8.2.2	Axiom help page	349
8.2.3	fortran code	350
8.2.4	lisp code	351
8.3	cdotc - dot product of two complex vectors $X^H Y$	352
8.3.1	Axiom unit tests	352
8.3.2	Axiom help page	352
8.3.3	fortran code	353
8.3.4	lisp code	354
8.4	cdotu - dot product of two complex vectors $X^T Y$	355
8.4.1	Axiom unit tests	355
8.4.2	Axiom help page	355
8.4.3	fortran code	356
8.4.4	lisp code	357
8.5	crotg - determines a complex Givens rotation	358
8.5.1	Axiom unit tests	358
8.5.2	Axiom help page	359
8.5.3	fortran code	359
8.5.4	lisp code	360
8.6	cscal - scales a vector by a constant	361
8.6.1	Axiom unit tests	361
8.6.2	Axiom help page	362
8.6.3	fortran code	362

8.6.4	lisp code	363
8.7	csrot - applies a plane rotation	364
8.7.1	Axiom unit tests	364
8.7.2	Axiom help page	364
8.7.3	fortran code	366
8.7.4	lisp code	367
8.8	csscal - scales a complex vector by a real constant	368
8.8.1	Axiom unit tests	368
8.8.2	Axiom help page	369
8.8.3	fortran code	369
8.8.4	lisp code	370
8.9	cswap - interchanges two vectors	371
8.9.1	Axiom unit tests	371
8.9.2	Axiom help page	372
8.9.3	fortran code	372
8.9.4	lisp code	374
9	BLAS Level 1 Complex16 Vector Operations	377
9.1	zaxpy - constant times a vector plus a vector	377
9.1.1	Axiom unit tests	377
9.1.2	Axiom help page	381
9.1.3	fortran code	384
9.1.4	fortran unit test	385
9.1.5	lisp code	391
9.2	zcopy - copies a vector x to a vector y	394
9.2.1	Axiom unit tests	394
9.2.2	Axiom help page	394
9.2.3	fortran code	395
9.2.4	lisp code	396
9.3	zdotc - dot product of two complex vectors $X^H Y$	397
9.3.1	Axiom unit tests	397
9.3.2	Axiom help page	398
9.3.3	fortran code	399
9.3.4	lisp code	401
9.4	zdotu - forms the dot product of two complex vectors $X^T Y$	402
9.4.1	Axiom unit tests	402
9.4.2	Axiom help page	402
9.4.3	fortran code	404
9.4.4	lisp code	405
9.5	zdrot - applies a plane rotation	406
9.5.1	Axiom unit tests	406
9.5.2	Axiom help page	407
9.5.3	fortran code	408
9.5.4	lisp code	409
9.6	zdscal - scales a vector by a constant	411
9.6.1	Axiom unit tests	411

9.6.2	Axiom help page	411
9.6.3	fortran code	412
9.6.4	lisp code	413
9.7	zrotg - determines a double complex Givens rotation	414
9.7.1	Axiom unit tests	414
9.7.2	Axiom help page	414
9.7.3	fortran code	417
9.7.4	lisp code	418
9.8	zscal - scales a vector by a constant	418
9.8.1	Axiom unit tests	418
9.8.2	Axiom help page	419
9.8.3	fortran code	420
9.8.4	lisp code	421
9.9	zswap - interchanges two vectors	422

Volume 12: Axiom Crystal

Axiom Crystal Design	1
1.1 Book presentation	1
Book spines	1
Linking information	2
Experiments	3
1.2 Hide/Show a div element	3
1.3 Hide/Show a nested div element	4
1.4 Hide/Show a ring of elements	5
Other work	7
1.5 Understanding the Dynamics of Complex Lisp Programs [?]	7
Bibliography	9

Volume 13: Proving Axiom Correct

1	Here is a problem	3
1.1	Setting up the problem	3
1.2	Axiom NNI GCD	4
1.3	Mathematics	6
1.4	Approaches	8
2	Theory	11
2.1	The Division Algorithm	12
3	Software Details	15
3.1	Installed Software	15
4	Temporal Logic of Actions (TLA)	17
4.1	The algorithm	17
	Creating a new TLA+ module	18
	Definitions	18
	Constants and variables	19
	The specification	19
	Summary	20
4.2	A simple proof	20
	The invariant	20
	Checking proofs	20
	Using facts and definitions	21
4.3	Divisibility Definition	22
5	COQ proof of GCD	25
5.1	Basics of the Calculus of Constructions	25
	Terms	25
	Judgements	26
	Inference Rules	26
	Defining Logical Operators	27
	Defining Types	27
5.2	Why does COQ have Prop?	27
5.3	Source code of COQ GCD Proof	28
6	LEAN proof of GCD	37
7	Formal Pre- and Post-conditions	45
8	Types and Signatures	47
9	COQ nat vs Axiom NNI	51
	Library Coq.Init.Nat	51

10 Other Ideas to Explore	59
